Another Day in Paradise

Open a window to an amazing room for all occasions. With Paradise units that slide, bi-fold and swing open, you can create a multi-function room. Alfresco dining, light entertaining or simply opening up to the outdoors the Paradise Room has you covered.

Eclipse Priva Screen Slats

The Eclipse Priva Screen Slat system is a long spanning slat system perfect for privacy screens, fencing and even gates.

Paradise Weather Beater

A sliding or folding sash system great for your existing or new screen area requiring extra weather protection that can be modified to suit the season.

Screen Room

A proven outdoor system that has been used for decades in Australia. Keeping bugs and leaves out is always important, especially if your outdoor room is an entertaining and dining area or a popular room with the kids. The screen room also comes in sliding and stackable options.

Glass Room

See it all with the addition of a glass room to your home. HV Aluminium can plan and design the rooms to suit your environment and goals.

For the entertainer

Whatever the weather, the sky is the limit and your ceiling. With the Eclipse Opening Roof the design options are broad and uses are varied. You can design your own outdoor room, poolside patio cover or awning, a shady retreat and much more. If you can dream it, the Eclipse can most likely achieve it.

Eclipse Flat Louvre

Open your roof to allow the sun's natural light and warmth into your outdoor area and adjacent rooms. You can rotate the louvres through almost 180 degrees to block the sun while still allowing light and ventilation. Clean-line, flat finish when closed.

Eclipse Shutters

Elegant and functional Eclipse Shutters can make a great addition to an outdoor area. Eclipse Shutters are fully rotatable and can be fitted above and below handrails or to the end of a balcony. The shutter frame also comes with a fly screen receiver so the shutters can be mounted to the outside of windows and it keeps the bugs out too.

Eclipse Sun Louvre

The Sun Louvre Range is an environmentally friendly option to help lower your heating and cooling costs. Imagine the savings with a Sun Louvre design blocking out harsh summer sun, but allowing warm rays inside through winter.

Create your own oasis

Enjoy perfect conditions every day with your very own Oasis. Relax in your pool area with the benefit of reduced maintenance. The Florida Pool Enclosure helps keep out leaves and flying debris from your pool, giving you more time to do the things you enjoy most.

Patio Cover

Your patio roof can be pitched, saw tooth, raked or many combinations. You can create a Patio Cover for shelter but still allow the light in with specially designed naturelight sheets.

Carport

A carport can double as space for BBQs, parties and family gatherings. With new materials and styles available your carport can be much more than just a place to park your car. Suits Insulated, W Pan or Flat roof profiles.

Evo Automatic Mesh Blinds

A great, contemporary solution for effectively reducing glare and UV entering the home, whilst maintaining your views. Your choice of remote or manual control.

Pergola

Perfect for those who want to create their own sanctuary. Hang pot plants, or grow vines to extend the garden up from the floor level.

Freestanding Outdoor Room

Perfect as a quick retreat without having to go back inside the house for those with a pool or utilised backyard.

Services

Free Measure and Quote

HV Aluminium understands that it takes time and effort to organise a new home improvement, so we do our best to make things easy for you with a free measure and quote service. One of our dedicated team of consultants will happily come to you and offer help to design the right project for your home and lifestyle.

The free measure and quote service is free of cost and there is no obligation to buy.

Part of the free measure and quote service can also involve our design imaging service which lets you see how your project will look before it's built.

Local Area Supply/Install

HV Aluminium has been serving the Newcastle and Hunter area since 1978 with a unique design and build service that turns your outdoor living plans and ideas into a reality. HV Aluminium is a fully licensed builder, which allows HV Aluminium to build all aspects of construction, unlike restricted builders license holders. Quality staff in all areas of the business makes constructing your Outdoor Living area a breeze.

HV Aluminium can take care of all aspects of the project, from the initial quote to design options, through to your project's completion. We do the work giving you the time to relax. Enjoy the lifestyle you deserve with HV Aluminium's range of home improvement options. Whether it's casual entertaining, alfresco dining, blending indoors and outdoors or simply relaxing in your resort style outdoor room, the choice is yours.

Working with Your Builder

Whether you are doing the construction yourself or with a builder, we can still help. Starting with the free measure and quote on the materials and design imaging to show you what the project will look like after construction. We can also help with council approvals and offer a delivery service to a wide area.

All D.I.Y. kits are designed specifically for your home, with plans drawn up before materials are ordered to ensure the project is meeting your requirements.

Materials are delivered at exactly the right length where possible (e.g. roof sheets) but cutting and drilling is required for most extrusions and gutters which will help allow for any slight adjustments.

Instructions are supplied with each D.I.Y. kit to help you complete the project in a timely manner. And further assistance is just a phone call away.

Design Imaging Services

One of the main questions people ask when designing a new outdoor area is "what will it look like on my home?" At HV Aluminium we can show you with our design imaging service that uses real photos of your home and real product photos.

The Design Imaging can be part of the free in home measure and quote service we provide to you. The design consultant can take a photo of your home and discuss with you what type of area you are trying to create. The consultant then has the information required to go and work out the image for you.

Colour, product and design can all be viewed with the design imaging service, giving you a very real impression of the finished project on your home.

Counter Sales

HV Aluminium stocks a variety of lengths and colours in several standard and specialist sections for sale over the counter. These are available in full and half lengths and we can cut material to length for you in most cases.

Some of the materials HV Aluminium have for counter sales are listed below – Angle, Post, Screen Post, Half Screen Post, Beam sections, Single Skin and Insulated Roof sheet (and under roof profile inserts to keep the bugs out), Ceilink Insulation Panel and Aluminium Cladding. These are available in a number of colour selections.

HV Aluminium also stock a specialised PVC downpipe system which includes downpipe, elbow, T-piece, outlet/drop and joiner in 68mm and 80mm diameter.

Wholesale

The Wholesale Department of HV Aluminium supplies quality Outdoor Living Products to the nation and internationally and has been doing so since 1995.

Available products are the Eclipse Opening Roof, the Paradise Room screen enclosure system and the Sun Louvre range. The most recent product added is the Flat Eclipse Louvre Opening Roof. As the name suggests it gives a flat roof feel when closed, yet still has the opening roof flexibility.

The National dealer network extends to every state and capital city in Australia. Many regional dealers complete the coverage to most areas in between.

The International market has also grown and supplies to many overseas destinations including but not limited to the USA, South Africa, New Caledonia, Singapore, Martinique, India and New Zealand.

A photograph of an outdoor dining area at dusk. The scene is set on a wooden deck under a pergola with a slatted roof. A wooden dining table is surrounded by chairs with white cushions. In the background, there are palm trees and a white wall. The sky is a deep blue, and a single light fixture is visible on the pergola structure.

Nothing but the best
for our customers

Always conscious of using only the best products and tradespeople, as well as having a company credo of doing "what is right" not necessarily what is financially expedient, it wasn't long before HV Aluminium became the leading home improvement builder in Newcastle, Lake Macquarie and the Hunter Valley (New South Wales, Australia).

Below are a small sample of testimonials from past projects that we were proud to be a part of:

Testimonials

Project: Flat Eclipse Opening Roof

"I want to say to you and the HV team that we love, love, love our roof! It does everything I hoped it would do. It lets the sunshine in and keeps the rain out. Working Beautifully."

Janelle & John

Project: Patio Cover

"I'd like to extend my compliments to HV Aluminium and your installer for the excellent service provided to us. We have found your staff to be professional, polite and committed to excellent customer service. Thank you again."

Jan & Stuart

Project: Paradise Room

"Thank you for my wonderful new outdoor area - Paradise Room. This whole process has been streamlined and easy and I want to thank you for your patience with my questions, your professionalism and just plain good old fashioned service. It really has been a pleasure dealing with you all."

Sue

Project: Patio Roof

"I would like to express our thanks for a job well done. We were impressed by all your staff that we have communicated with and in particular we wish to commend your installer who has done a great job, taking great care in achieving a great finish."

Fred & Mary
