

WC200 'M' Series Roof Controller User Guide

*The **"M" Series Roof Controller** is an electronic switching unit that enhances the benefits you can enjoy from your **Opening Roof**. The unique design of the **"M" Series Roof Controller** ensures easy and convenient operation of your Roof and will even memorise your preferred settings. A key feature of the unit is a **Rain Sensor** that is mounted on the roof that will automatically close all roof banks when it starts to rain.*

*The **"M" Series Roof Controller** operates by use of the six buttons on the switch plate. When the buttons are pushed individually they operate the primary functions of the unit. When two buttons are pressed together, additional secondary functions are operated.*
